

Ecuador - Galapagos Northern & Eastern Islands 8 Days | Horizon Trimaran

Trip Code
ECHT8DA
Departure

Introduction

Imagine an exciting expedition style cruise of the Galapagos Islands. Climb onboard the Horizon Trimaran, the only tri-hull vessel cruising in the Galapagos. On this expedition cruise you will be visiting multiple islands over 8 amazing days. Explore the islands with a National Park certified guide spotting a variety of endemic fauna and flora. Participate in activities such as panga (zodiac rides) spotting a different species of birds, walks and hikes, observing wildlife and snorkeling with sea lions and turtles. Between outings you will find time to relax onboard and enjoy informative lectures from your guide.

Itinerary

Ecuador - Galapagos Northern & Eastern Islands 8 Days | Horizon Trimaran

Departure

Selected Saturdays

Duration

8 Days

Arrive San Cristobal airport You will

Location San Cristobal Island in the

Ecuador, Galapagos Islands, South America

Heading After passing through immigration

and baggage claim, you will be met by a

Horizon staff member and transferred to the

Trimaran. You will be shown to your cabin

where you will have some time to settle in

before lunch and a welcome briefing. PM:

San Cristobal interpretation center The

Gianni Arismendy Interpretation Center was

opened in 1998 as a phase of the project

“Interpretation and Environment Education

Project.” Visitors can enjoy expositions on

natural history, human history, and

environment protection. The conservation

efforts represent the movement to protect

the wildlife and natural environment

through population and tourist control. The

Gianni Arismendy Interpretation Center

features an outdoor stadium, audio-visual

equipment, and meeting rooms.

Departure

~~Selected Saturdays~~ ~~Day 2: Pitt Point & Kicker Rock~~

Duration

~~8 Days~~

AM: Pitt point Pitt Point, located on San Cristobal Island's northeastern tip, is home to frigate birds, storm petrels, and all three

types of boobies: Nazca, blue-footed, and red-footed. A steep trail leads visitors up a cliff and through a ravine to an area teeming with birds. This location is also excellent for snorkeling and scuba diving.

PM: Witch hill & Kicker rock Located on the northern coast, witch hill and its surroundings present one of the most picturesque beaches in the Galapagos with its white powdery sand and the abundance of animals. Wildlife includes sea turtles, rays, and various types of booby birds. The clear water provides an excellent opportunity for enjoying swimming and snorkeling. Kicker rock formation is located about two hours west of San Cristobal. The rocks protrude from the water and stand vertically hundreds of feet above the ocean, separated by a small channel. Although there are no landing areas, visitors can see a variety of marine life through circumnavigation and dinghy rides.

DAY 3: Suarez Point & Gardner Bay

AM: Punta Suarez Blue-footed boobies, albatrosses, and Nazca boobies can all be found in this area. The large waved albatrosses use the cliff as a launching pad, making it a beautiful location on the ocean front. The magnificent blowhole, which shoots water high into the air, is the most well-known attraction. This location offers fantastic photo opportunities. PM: Gardner Bay Gardner Bay, on the eastern side of the island, is the breeding site of nearly all of the world's 12,000 pairs of waved albatrosses. It has a large white sandy beach with a plethora of sea lions, making it ideal for relaxing. Because of its rocky shores, this location is ideal for diving and snorkeling.

Departure

Selected Saturdays
Day 4: Las Bachas Beach & Bartolome Island

Duration

8 Days
AM: Las Bachas beach Las Bachas beach,

Location on Santa Cruz Island's north shore,

Ecuador, Galapagos Islands, South America

is ideal for swimming and relaxing. A

floating pier, one of the few remaining

remnants of the US presence in the

Galapagos during WWII, can be seen here.

There may be flamingos, Sally Lightfoot

crabs, hermit crabs, black necked stilts, and

whimbrels. Sea turtles lay their eggs on the

beach as well. PM: Bartolome Island

Bartholome is an extinct volcano with a

variety of red, orange, black, and even

green volcanic formations. It is home to the

famous Pinnacle Rock. A stairwell leads to

the volcano's summit, which offers one of

the best views of the islands. The beach is

ideal for snorkeling and possible Galapagos

penguin sightings.

DAY 5: Rabida Island & Puerto Egas

AM: Rabida Island Rabida Island (Jervis) is a

great snorkeling spot and one of the

archipelago's most colorful and volcanically

diverse islands. Its famous maroon sandy

beach and stunning lookouts provide

breathtaking scenery. The island is a

birdwatcher's paradise. Some of the rarest

species, such as nine varieties of finches,

large-billed flycatchers, Galapagos hawks,

and brown pelicans, are plentiful. PM:

Puerto Egas Egas Port, also known as James

Bay, is home to the curious Galapagos

hawks and the quick-footed Galapagos lava

lizards. The trail leads to a coastline with

beautiful tide pools and fauna-filled grottos.

The Galapagos fur sea lions sunbathe here.

This is also an excellent snorkeling location.

 Departure
 Selected Saturdays
 Darwin Island
 Duration
 8 Days

AM: Darwin Bay This white sand coral beach leads to a half-mile (0.75km) trail that winds through mangroves teeming with land birds. Here you can see Nazca boobies, red-footed boobies, and swallow-tailed gulls. Tidal pools with playful sea lions can be found further down the path. At the end, there is a breathtaking view from a cliff.
PM: El Barranco El Barranco's steep, rocky paths, also known as Prince Phillip's Steps, lead up to a high cliff-face. From here, you can enjoy a spectacular view. Palo santo vegetation can also be found here, as well as red-footed boobies, short-eared lava owls, Galapagos swallows, and Galapagos doves.

DAY 7: Mosquera Islet & Tortoise Breeding Center

AM: Mosquera Islet This reef of rocks and coral (the result of an uprising) is only 160 meters across at its narrowest point, located between the islands of Baltra and North Seymour. This island is home to many shorebirds and has one of the largest populations of sea lions. There have been reports of orcas feeding on sea lions at this location on occasion. **PM:** Santa Cruz tortoise Breeding Center The Charles Darwin Research Station is home to turtles ranging from 3-inches (new hatchlings) to 4-foot long. Subspecies of turtles interact with one another and many of the older turtles are accustomed to humans stretching out their heads for a photo opportunity. The babies are kept until they reach the age of four and are strong enough to survive on their own.
