ACPQSJSA
Departure

Introduction

The magnificent mountain ranges are stunningly snow-capped in May and June, the midnight sun is at its peak, and bird colonies are teeming with life. We can observe the constantly shifting ice formations, as the ice gradually releases its hold on numerous sealed-off locations around the islands. Spring has fully arrived. We cruise over glistening glaciers as we traverse the stunning Arctic tundra of Svalbard, pausing on land to admire the magnificent landscape. We also look for familiar creatures like polar bears, seals, and walrus.

Itinerary

DAY 1: Longyearbyen, Svalbard

We arrive in Longyearbyen and transfer to our hotel.

Departure

11/05/2026

Duration

8 Days Longyearbyen on your own before

Locations up your fellow travellers and

Svalbard & The Arctic

embark the small expedition ship M/S

Stockholm and sail out through Isfjorden.

We are now in a part of the world where we

are totally dependent on the ice and

weather conditions. Our exact itinerary

depends on these factors and on the wildlife

we encounter. Our ambition is to head out

on Zodiac cruises every day and to go

ashore when the opportunity arises. Here

are some examples of places we may visit:

Prins Karls Forland This narrow strip of

land is covered by a magnificent and snow-

covered mountain chain. The island is also

home to many seabirds and harbour seals.

Virgohamna, Danskøya Two of the most

courageous attempts to reach the North

Pole started on the island of Danskøya.

Swedish explorer Andrée made an attempt

with a hydrogen balloon and American

journalist Wellman started with an airship.

There are still interesting remnants from

these expeditions left on this site. Fantastic

fjords Svalbard offers the visitor countless

spectacular fjords. During our journey we

will explore a few of them such as:

Liefdefjorden, meaning "The fjord of love",

is lined with snow-covered mountain peaks

and here we hope to cruise along the face of

the spectacular Monaco Glacier. Many

common eiders and pinkfooted geese nest in

the area and if lucky we could see the rare

king eider. In Krossfjorden we revel in the

beautifully sculptured front of the 14th of

July Glacier to the raucous greeting of the

large number of kittiwakes and Brünnich's

guillemots nesting on the nearby cliffs.

Raudfjorden is an area of immense natural

beauty - dominated by beautiful glaciers. It

is also a favourite spot for seals and the bird

cliffs are bursting with activity. The

scientific village of Ny-Ålesund is situated in

Kongsfjorden. It was from here that

Amundsen and Nobile started their heroic

expeditions to the North Pole. North of

Spitsbergen North of Spitsbergen we might

meet the edge of the pack ice. Not many

ships venture here and we can marvel at the

silence and grandeur of this icy landscape.

We keep a lookout for the iconic wildlife.
