### Introduction

Join us on board the newly refurbished M/V Plancius, journeying from Ushuaia, the most southern city in the world and to the Antarctic Peninsula over an 11 day expedition. The Plancius is a new generation of Antarctic vessels and will ensure your trip to Antarctica won't be forgotten.

**Please Note: For 2026/27 Antarctic season departures Long Hikes are included in the cost of the trip, but subject to availability.**

### Long Hikes:

Long walks in Antarctica are designed for small groups of up to 24 passengers, accompanied by at least two expedition staff with experience in this terrain. These walks offer an immersive experience in the pristine polar landscape, requiring participants to be prepared for up to six hours of hiking on semi-rough, rocky and snowy terrain with notable elevation changes. While the pace will be steady and manageable, the conditions can be demanding and change quickly. A good level of fitness and willingness to walk for extended periods are essential. The total duration will vary depending on site conditions and explore the untouched expanses of the Antarctic wilderness. For those who prefer not to join the long hikes, alternative activities or shore landings will be available during this time.

DAY 1 - Embarkation in Ushuaia

Duration

11 Days

Your voyage begins where the world drops

off: Ushuaia, Argentina, reputed to be the

southernmost city on the planet, is located

on the far southern tip of South America.

Starting in the afternoon, you embark from

this small resort town on Tierra del Fuego,

nicknamed "The End of the World," and sail

the mountain-fringed Beagle Channel for

the remainder of the evening.

### DAY 2: Crossing The Drake - Day 2 & 3

Over the next two days on the Drake

Passage, you enjoy some of the same

experiences encountered by the great polar

explorers who first charted these regions:

cool salt breezes, rolling seas, maybe even a

fin whale spouting up sea spray. After

passing the Antarctic Convergence -

Antarctica's natural boundary, formed when

north-flowing cold waters collide with

warmer sub-Antarctic seas - you are in the

circum-Antarctic upwelling zone. Not only

does the marine life change, the avian life

changes too. Wandering albatrosses, grey-

headed albatrosses, black-browed

albatrosses, light-mantled sooty albatrosses,

cape pigeons, southern fulmars, Wilson's

storm petrels, blue petrels, and Antarctic

petrels are a few of the birds you might see.

Duration

11 Days

Gray stone peaks sketched with snow, lower of broken blue-white ice, and dramatically different weather below and above. You first pass the snow-capped Melchior Islands and Schollaert Channel, sailing between Brabant and Anvers Islands. Sites you may visit include: Danco Island - Activities here may focus on the gentoo penguins nesting on the island, in addition to the Weddell and crabeater seals that can be found nearby. Neko Harbour - An epic landscape of mammoth glaciers and endless wind-carved snow, Neko Harbour offers opportunities for a Zodiac cruise and landing that afford the closest views of the surrounding alpine peaks. Paradise Bay - You may be able to take a Zodiac cruise in these sprawling, ice-flecked waters, where there's a good chance you'll encounter humpback and minke whales.

### DAY 8: South Shetland Islands

The volcanic islands of the South Shetlands are windswept and often cloaked in mist, but they do offer subtle pleasures: There's a wide variety of flora (mosses, lichens, flowering grasses) and no small amount of fauna (gentoo penguins, chinstrap penguins, southern giant petrels). In Deception Island, the ship plunges through Neptune's Bellows and into the flooded caldera. Here you find hot springs, an abandoned whaling station, and thousands of cape petrels - along with kelp gulls, brown and south polar skuas, and Antarctic terns. A good hike is a possibility in this fascinating and desolate volcanic landscape. As an alternative, you may be able to engage in activities near Half Moon Island. Here chinstrap penguins and Weddell seals often haul out onto the beach near Cámara Base, an Argentine scientific research station. Conditions on the Drake Passage determine the exact time of departure.

11 Days

Your return voyage is far from lonely. While crossing the Drake, you're again greeted by the vast array of seabirds remembered from the Antarctic Peninsula. Antarctica. The passage south. But they seem a little more familiar to you now, and you to them.

### DAY 11: Disembarkation in Ushuaia

Every adventure, no matter how grand, must eventually come to an end. It's now time to disembark in Ushuaia, but with memories that will accompany you wherever your next adventure lies.
